

**Prof. Dr. Dr. Bertram Flehmig**

\*23.07.1947

†27.05.2024

The Mediagnost Gesellschaft für Forschung und Herstellung von Diagnostika GmbH mourns the loss of its founder, partner, and managing director, Bertram Flehmig.

As a pioneer and forward-thinker, he shaped the company with unwavering energy, a spirit of research, and caring.

His groundbreaking research at the University of Tübingen on the Hepatitis A virus, which he was one of the first to culture in cell cultures, was a milestone. This successful large-scale cultivation of the Hepatitis A virus in 1985 laid the foundation for the establishment of Mediagnost GmbH.

His innovative ideas and creativity as a researcher and entrepreneur in various fields led to the continuous expansion of Mediagnost GmbH's product portfolio and business areas.

Bertram Flehmig was a man of many interests who always looked after all the needs of Mediagnost GmbH and its employees with care, attention and concern.

It is with deep sadness that we bid him farewell.

The managing directors, employees and shareholders of Mediagnost GmbH
